Art Unit: 3635

1. This Office action is in response to the amendment filed 11/16/06. Claims1-29 and 31-54 are pending with claims 1-23 and 31-40 withdrawn from consideration. Claim 30 has been canceled.

- 2. The following is a quotation of the second paragraph of 35 U.S.C. 112:

  The specification shall conclude with one or more claims particularly pointing out and distinctly claiming the subject matter which the applicant regards as his invention.
- 3. Claim 49 is rejected under 35 U.S.C. 112, second paragraph, as being incomplete for omitting essential structural cooperative relationships of elements, such omission amounting to a gap between the necessary structural connections. See MPEP § 2172.01. The omitted structural cooperative relationships are: the removable block for forming the indentation is not related to any of the structure of the wall assembly.
- 4. The text of those sections of Title 35, U.S. Code not included in this action can be found in a prior Office action.
- 5. Claims 24-29, 42, and 43 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 3,440,785 to Denny et al.

Denny et al. provides a concrete wall assembly comprising vertical studs 20 having first and second panels 22 fastened thereto. Concrete 30 cavities are formed between the panels 22. Ports comprising window openings (Figure 2 and column 5, line 9) and door openings (Figure 1 and column 5, lines 1+) are

Art Unit: 3635

provided. The figures show the port opening provided with port receiving openings along the top and bottom thereof. The sill and jamb of the window opening are shown with a rabbet or indentation for receiving a window frame.

The port is open in a vertical direction. Concrete contacts a portion of a window frame as shown in figure 2.

6. Claims 24, 25, 27-29, and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,974,751 to De Zen.

De Zen provides a concrete wall assembly comprising vertical studs 120 having first and second panels 11 fastened thereto. Concrete cavities are formed between the panels 11 (See figure 10). Ports comprising window openings 39 (Figure 7) and door openings 40 (Figure 7) are provided. The ports are open in the vertical direction.

7. Claims 24, 28, 29, 41 and 42 are rejected under 35 U.S.C. 102(b) as being anticipated by U.S. Patent 5,819,489 to McKinney.

McKinney provides expanded polystyrene or "foam" (column 4, line 20) panels 20 fastened to a frame of studs 10 forming concrete receiving cavities.

8. Claims 44-48 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.

Art Unit: 3635

9. Claim 49 would be allowable if rewritten or amended to overcome the rejection(s) under 35 U.S.C. 112, 2nd paragraph, set forth in this Office action.

Page 4

- 10. Claims 50-54 are objected to as being dependent upon a rejected base claim, but would be allowable if rewritten in independent form including all of the limitations of the base claim and any intervening claims.
- 11. Applicant's arguments filed 11/16/06 have been fully considered but they are not persuasive.

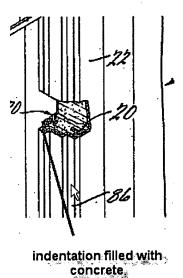

Applicant's argument that Denny does not disclose an insulative panel is not persuasive. First, all building material have an inherent insulating value.

Second, as applicant notes, Denny does state that the panels may be plastic.

Plastics are well known in the building arts as having insulating properties.

Applicant's argument that Denny does not disclose a window opening comprising a concrete indentation is not found persuasive. This is show in figure 2 as shown below. This also shows the concrete contacting a portion of a window frame (claim 43).

Art Unit: 3635

Applicant's arguments that De Zen fails to disclose an insulative panel are not found persuasive for the same reasons discussed above with respect to Denny. De Zen discloses polyvinyl chloride panels as noted by applicant. Polyvinyl chloride inherent meets the limitation of an "insulative panel".

It is noted that claim 26 was not rejected under DeZen in the previous Office action.

- 12. The prior art made of record and not relied upon is considered pertinent to applicant's disclosure.
- 13. Applicant's amendment necessitated the new ground(s) of rejection presented in this Office action. Accordingly, **THIS ACTION IS MADE FINAL**. See MPEP § 706.07(a). Applicant is reminded of the extension of time policy as set forth in 37 CFR 1.136(a).

Art Unit: 3635

A shortened statutory period for reply to this final action is set to expire THREE MONTHS from the mailing date of this action. In the event a first reply is filed within TWO MONTHS of the mailing date of this final action and the advisory action is not mailed until after the end of the THREE-MONTH shortened statutory period, then the shortened statutory period will expire on the date the advisory action is mailed, and any extension fee pursuant to 37 CFR 1.136(a) will be calculated from the mailing date of the advisory action. In no event, however, will the statutory period for reply expire later than SIX MONTHS from the date of this final action.

14. Any inquiry concerning this communication or earlier communications from the examiner should be directed to Robert J. Canfield whose telephone number is 571-272-6840. The examiner can normally be reached on M-Th.

If attempts to reach the examiner by telephone are unsuccessful, the examiner's supervisor, Friedman Carl can be reached on 571-272-6842. The fax phone number for the organization where this application or proceeding is assigned is 571-273-8300.
